Intake Assessment & Periodic Physical Assessments

It is crucial to conduct a thorough physical assessment of residents before intake to ensure that the facility is equipped to support the needs of the residents. Our intake assessments are facilitated by the Registered Nurse on Staff, the resident's doctor or hospital input/notes as well as our community's Certified Assisted Living Manager. The assessment results determine whether the resident will need Level 1, 2, or 3 of care. Subsequent periodic assessments are done to determine if the resident's conditions or needs have changed.

Medication Management

Medications are an essential part of the care and well-being of seniors with acute or chronic conditions. When used appropriately, medications are effective treatments. Pain relievers, for example, help a person with arthritis to button a shirt. While medication is beneficial, it could also be hazardous if taken incorrectly, omitted, or not monitored for potential adverse drug reactions and interactions with other medications. 85% of the residents require assistance with the management of their medication. The medicines dramatically improve a resident's quality of life.

OVERALL LEVEL OF CARE NEEDED

- Our Delegating Registered Nurse Coordinates Medication Management Services With The Residents' Physicians.
- Our Community Has A Good Working Relationship With A Local Pharmacy That Will Deliver Our Residents' Medications Directly To Our Community.

Level 3 Licensed Community

Assisted Living "Levels Of Care" Generally Refer To How Much Assistance A Person Needs With Activities Of Daily Living (ADLs) As Well As Management Of One's Health.

- ADLs Include Tasks Like Getting Dressed, Taking A Bath Or Shower, Brushing Your Teeth, Washing Your Hair, Eating And Using The Restroom.

Medication Needs May Depend On Whether The Individual Can Take Prescription Medications Or Manage Chronic Conditions Independently (Such As A Diabetic Who May Need To Inject Insulin), Or Whether Some Assistance From A Caregiver Is Needed.

- After Reviewing Individual ADLs And Medical Requirements Through The Assessment, The Resident's Overall Level Of Care Needs Can Be Assessed As Follows.

OVERALL LEVEL OF CARE NEEDED

- After Reviewing Individual ADLs And Medical Requirements Through The Assessment, The Resident's Overall Level Of Care Needs Can Be Assessed As Follows.

Level 2

Intermediate or moderate level of care. The resident may be independent with some ADLs, such as feeding oneself, but needs help with others, such as getting dressed.

Level 3

High level of care. This individual has impairments that affect multiple ADLs and requires a comprehensive level of assistance from multiple caregivers.

RN Oversight And Service Plan Review Of Each Resident

RN Oversight Can Build A Team With Residents, Their Families, Their Physician, And Other Professionals, Which Leads To Improved Health And Wellness. By Being Present And Working In The Community, The Nurse Is Able To Get To Know Each Resident On An Individual Basis And Determine The Best Approaches To Health Issues. They Have The Time To Really Listen And Respond To Each Resident And Their Family Members.

- Professional Personalized Care Plans Prepared By An RN Are Designed To Promote Health, Independence, And Quality Of Life. Anyone Can Write A Service Plan, But Only A Registered Nurse Can Complete A Comprehensive Clinical Assessment Of A Resident's Overall Health Status And Devise A Care Plan Specifically For That Resident, Taking Into Account Not Only Their Individual Needs But Also Their Strengths And Available Resources.

Partnership With Hospital,Doctors

We maintain close relationships with nearby hospitals, physicians, specialists, and pharmacies for seamless continuity of care.

24x7 Supervision By Skilled And Dedicated Staff

All of our caregivers are hired on a W-2 basis and are thoroughly vetted, extensively trained, and closely supervised. We have our own Manager and Nurse on staff who oversee all residents' condition, their medication, and charts consistently. The low caregiver-to-resident ratio allows us to provide undivided attention to your daily needs.

Exceptional Care & Amenities

Location And Home Structure

Our community is a one-level rambler style so your loved one does not need to worry about walking up and down stairs. We are located in the beautiful town of Olney, Maryland, a wonderful place with a small-town feel. You will LOVE living in Olney, a safe and quiet neighborhood with access to top notch hospitals and doctor offices less than 10 mins away! Plenty of Seniors live in Olney and Crown Rivers is the best place to live where parks, gardening, activities, and supermarkets are plentiful with lots of outdoor backyard space.
